Hybrid Mobile Development and IBM BlueMix (Guest Lecture by Mr. Raymond Camden): Objectives and Outcomes

We are very fortunate to have Mr. Raymond Camden, a developer advocate for IBM. His primary focus is on MobileFirst, hybrid mobile development, and client-side technologies. In this lesson, he introduces IBM Bluemix briefly and gives a quick tour of the hybrid mobile support available in the Bluemix platform. The additional resources give pointers to some of Mr. Camden's own blog posts elaborating on this further. Also pointers to various IBM Bluemix resources, in particular with reference to hybrid mobile development support are included. At the end of this lecture, you will be able to:

- Understand the basics of the IBM Bluemix platform
- Understand the mobile first support available within the platform
- Begin to explore IBM Bluemix as a server-side approach for use in the upcoming courses.
