

## Code Clinic Tips

For each mini-project, the Code Clinic Tips page includes a collection of tips that address some of the common misconceptions and difficulties faced by students when implementing the week's mini-project. These tips are based on an analysis of thousands of help requests emailed to the Code Clinic (*interactivepython@online.rice.edu*).

Please consult these tips first when working on the week's mini-project. If the tips prove unhelpful, next consult the class forums for posts related to your issue. If you can't find a relevant thread, feel to start your own thread. Finally, if you are still having difficulty, feel free to send an email to the Code Clinic at *interactivepython@online.rice.edu*. Be sure to include a description of your problem and please include a CodeSkulptor URL for your code. A staff member will respond to your email as soon as possible.

### Tip #1

Make sure that you spell "shrubbery" correctly.
