

# Data Binding: Objectives and Outcomes

In this lesson you will learn about data binding and how data binding enables the flow of information between the component and its template. You will learn about interpolation, property attribute and event binding and the use of two-way data binding. At the end of this lesson you will be able to:

- Understand how the data flows between the component code and its template
- Understand how one-way and two-way data binding can be used to effect the flow of data.
