

Practice Mini-project

This is an optional mini-project created by Andrea, a long time community TA for this class that includes many of the elements of Rock-paper-scissors-lizard-Spock . If you are having trouble getting started on RPSLS, try working through this practice project first. Don't hesitate to look at the answer if you have trouble. Since it's a practice project, and not graded, you can freely discuss it in class forum, and even post your code when asking for help!
