

# Neo4j

## Downloading, Installing, and Running Neo4j - Supplementary Resources

Download Neo4j at:

<http://www.neo4j.com/>

Check your system requirements at:

<http://neo4j.com/docs/stable/deployment-requirements.html>

If you have difficulties with installing the default version of Neo4j, for example issues with Windows 7 and .NET, try browsing to the "Other Releases" page at:

<http://neo4j.com/download/other-releases/>

and download a different version.

### Linux Installation

The Neo4j web site includes brief generic installation instructions for Neo4j.

1. Open up your terminal/shell.
2. Extract the contents of the archive, using: `tar -xf <filecode>`. For example, `tar -xf neo4j-enterprise-2.3.0-unix.tar.gz` the top level directory is referred to as `NEO4J_HOME`
3. Run Neo4j using, `$NEO4J_HOME/bin/neo4j console` Instead of 'neo4j console', you can use `neo4j start` to start the server process in the background.
4. Visit <http://localhost:7474> in your web browser.
5. Change the password for the 'neo4j' account.

For Debian/Ubuntu run:

```
wget -O - https://debian.neo4j.org/neotechnology.gpg.key | sudo apt-key add -  
echo 'deb http://debian.neo4j.org/repo stable/' >/tmp/neo4j.list  
sudo mv /tmp/neo4j.list /etc/apt/sources.list.d  
sudo apt-get update  
sudo apt-get install neo4j
```
