

# After completing this course, you will be able to... I

## Coursera

- Evaluate successful interview and job skills both on technical and soft-skill merit
- Recognize the value of soft skills in Computer Science.
- Define a tech interview and describe the process of applying to get one
- Use a rubric to critique resumes
- Speak clearly and confidently about yourself
- Write code in a Google doc in a high-pressure situation
- Describe prior projects to make your contribution clear
- Solve new problems on the whiteboard under pressure, using appropriate communication skills
- Describe best-practices, tips, and common pitfalls for successful interviews

And we hope...

- **Ace your technical interviews!**
