

Using the Cordova Camera Plugin: Objectives and Outcomes

In this lesson you will learn about the Cordova camera plugin and the corresponding ngCordova wrappers. You will understand how to leverage the built-in camera on your device to obtain image data. You will also learn about specifying options for the plugin. At the end of this exercise, you will be able to:

- Use the Cordova camera plugin and the ngCordova wrapper within your application
- Leverage the built-in camera of your device through the plugin to obtain image data from the camera.
