

Practice Mini-project

This is a practice mini-project, created by Andrea, a long time community TA, that builds on the week 1 Practice Mini-project "The Magical Octosphere". If you are having trouble getting started on "Guess the Number", try working through this practice project first. Don't hesitate to look at the answer if you have trouble. Since it's a practice project, and not graded, you can freely discuss it in this forum, and even post your code when asking for help!
