Angular Service Basics: Objectives and Outcomes

In this lesson you will learn about the basics of Angular services and how they interact with Angular components. You will also learn the basics of Model-View-Controller (MVC) and Model-View-ViewModel (MVVM) software engineering paradigms. You will also be introduced to the basics of Dependency Injection (DI). At the end of this course you will be able to:

- Add an Angular service and inject into a module and make use of it in the components.

- Understand the basics of MVC and MVVM, and DI.
