Instructions

Assignment 1 Resources
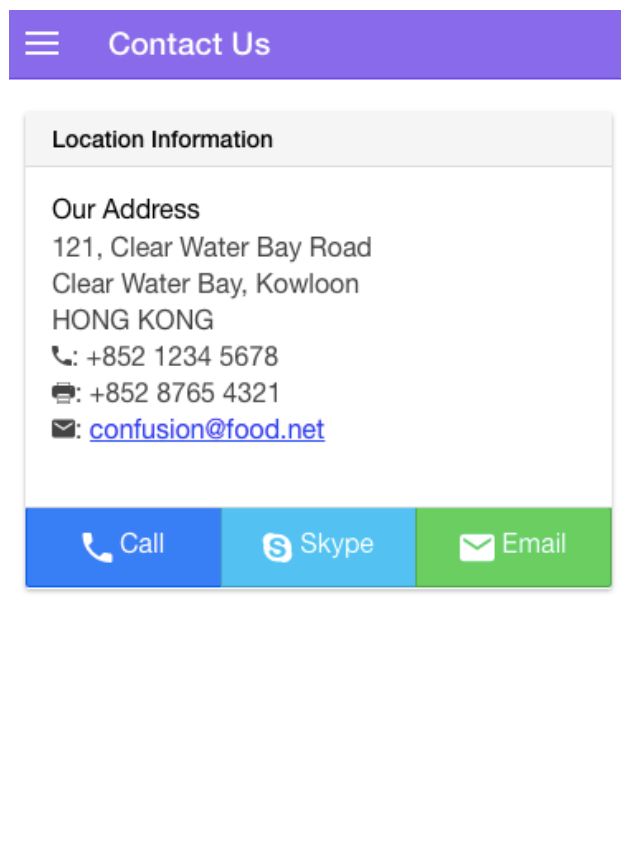

Assignment1.txt

Assignment Overview

In this assignment, you will update the Ionic app to add the "Contact Us" and "About Us" pages.

Assignment Requirements

Task 1

In this task, you will update the Contact Us page to show the address and the three buttons as shown in the image below:

- You should create a card to display the address as shown in the image. The address information is provided in the text file*Assignment1.txt* above.

- You should show the three buttons for Call, Skype and Email as shown in the image above using the button bar.

- You should use the font icons supplied by Ionic framework to add the icons to the address and the buttons as shown above.

Task 2

In this task, you will update the About Us page to show the history and list of corporate leaders of the restaurant. The History information is provided in the text file *Assignment1.txt* above.

- You will use the card to display the history. The text for the history is provided in the resources above.

- The corporate leadership information is obtained from the server through the AboutController. The information about the leaders is displayed using a list-inset style list.

- The list items are configured using one of the list item styles. You need to look up the list item styles in the Ionic framework documentation and figure out which style is the most appropriate for this purpose, and then apply the style to the list items.

Task 3

In this task, you will update the *AboutController* and the *app.aboutus* state in the *app.js* file.

- You need to update the AboutController for it to be able to retrieve the information about the leadership from the server

- You need to update the app.aboutus state in the app.js file to use the controller.

Your assignment will be assessed based on the following criteria:

Task 1

- The Contact Us page is showing the address of the restaurant in the card format as shown above.

- The three buttons are configured using the button bar and with the appropriate colors to show on the screen.

- Ionic font icons are used in both the address and the buttons.

Task 2

- The history information about the restaurant is displayed in a card format as shown above.

- The corporate leadership information is shown in the About Us page in the format as shown above.

Task 3

- The AboutController is appropriately updated to retrieve the information from the server

- The app.aboutus state has been updated in the app.js file
