REST API with Express, MongoDB and Mongoose: Objectives and Outcomes

In this lesson you will integrate the REST API that you developed with the Express framework earlier together with the Mongoose schemas and models and the MongoDB database to provide the complete end-to-end implementation of the server to support REST API. At the end of this lesson, you will be able to:

- Develop a full-fledged REST API server with Express, MongoDB and Mongoose

- Implement the end-to-end solution integrating Express, Node and Mongo.
