Angular and RxJS: Objectives and Outcomes

In this lesson we will examine the combination of Angular and RxJS, the reactive JavaScript frameworks. We will also examine some observables that are already built into the Angular framework and how we can leverage them to do reactive programming within Angular. At the end of this lesson you will be able to:

- Get a working overview of reactive programming, the observer pattern and the use of observables in Angular

- Make use of the Angular support for observables to do reactive Angular applications
